Rack with  
power conditioner

3 sockets @ drum-set

Guitar- Pedalboard  
Digital - Stereo

# Signal Chain

## Sound Guidelines

- Electronic tracks (synths, bass) are just as important in the mix as guitars and drums.
- Only the drum mix and the announcement microphones are required on the monitor path. Everything else is self-monitored.
- We use in-ear monitoring and no amplifiers.
- No wedges are needed

Thank you very much and have fun!

Best regards, Snippetu.
